**PETROX DRILLS FIRST VIKING CORE HOLE TEST WELL**

*For Immediate Release*

*Not for distribution in the United States or through United States wire services.*

**Calgary, Alberta** – November 15, 2013. Petrox Resources Corp. (TSXV: PTC) ("**Petrox**" or the "**Corporation**") announces that it has drilled its first vertical Viking core hole test well at 02-01-44-16W4 on its 100 percent owned Strome property in east central Alberta.

The Company is encouraged that certain portions of the Viking core contain reservoir quality oil-bearing sandstones. However, the current technical interpretation of this core does not support the drilling of the two planned horizontal wells adjacent to the core hole test well at this time.

Further core analysis is being undertaken and will assist Petrox technical personnel in their ongoing evaluation on its acreage position.
